

# Produtos Detectáveis

*Novos aliados em busca da Qualidade e Segurança Alimentar*

*Ferramentas HACCP e ISO/FSSC 22000*

*Os produtos detectáveis são projetados para resolver o problema de partículas de plástico e borracha que contaminam as linhas de produção de alimentos e farmacêuticas. Os produtos detectáveis são fabricados a partir de polímeros especiais que contêm aditivos uniformemente dispersos, dando propriedades magnéticas ao polímero, assim, a vantagem de ser detectável como um contaminante de metal, quando usado em conjunto com um detector de metal ou de raios-x. Produtos detectáveis podem ser usados como parte de seu processo HACCP e ISO 22000.*

## XDETECT<sup>®</sup> v2.0

Our flagship detectable plastic compound XDETECT, has benefited from over 20 years of technological refinement, making it one of the most advanced detectable compounds available on the market today. XDETECT plastic contains a special formulation of additives that result in a unique set of properties, which strive to meet our objective of developing the world's ultimate food safe plastic.

Our newest formulation of XDETECT is the most detectable, strong, and colourful compound we have ever made. It is also our most extensively tested compound with food contact approvals including FDA approved ingredients & full migration testing against EU and Japanese standards. With added antibacterial technology, this plastic is the science behind our world famous DetectaPen Range.

*BST products made from XDETECT benefit from the following properties:*

### ✓ Electromagnetically Detectable

XDETECT can be detected and rejected by industry standard in-line metal detection systems. It will even stick to a magnet, and has the same excellent material performance as regular polypropylene plastic.

### ✓ X-Ray Visible

Unlike many other detectable plastics, XDETECT contains an extra additive specifically designed for enhanced x-ray visibility. Customer feedback and independent testing has shown that our compound is highly visible in x-ray inspection applications.

### ✓ Shatter Resistant

The latest version of our compound is the toughest yet, designed not to shatter when exposed to harsh impacts, even in freezing conditions.

### ✓ Silver Ion Antibacterial Protection

As part of our ambition to achieve the ultimate in food safety, certain XDETECT products incorporate silver ion antibacterial technology. This technology is laboratory tested and proven to be effective against pathogenic germs and mould, including E Coli, MRSA and Salmonella. Antibacterial protection is built into our DetectaPen<sup>®</sup> range as standard.

### ✓ Bright Colours for Visual Detection & Colour Co-ordination

XDETECT is available in 8 bold and vibrant colours, making the plastic easy to spot as a foreign body with the added bonus of fitting into your production area colour co-ordination schemes.

### ✓ FDA & EU Food Contact Approval

XDETECT contains only FDA approved ingredients, and is fully compliant with the latest EU food contact regulations, including full migration testing against EU migration limits set out in regulation 10/2011.

## Stationery

### **BRC Issue 7 Clause 4.9.2.2**

*“Staples, paper clips and drawing pins shall not be used in open product areas.”*

### **BRC Issue 7 Clause 4.10.1.1**

*“A documented assessment in associated with the HACCP study shall be carried out on each production process to identify the potential use of equipment to detect or remove foreign body contamination”*

# Stationery ~ DetectaPen® Range

The BST DetectaPen has a long standing reputation as being the premier choice of factory writing equipment. Engineer Brian S Teasdale first invented the plastic detectable pen in 1994 and we've spent the last 22 years improving every aspect, resulting in what we believe to be the world's safest pen for use in food processing areas.

The shape and design of the pen is such that it is easy to hold and use, making it less likely to be dropped. Greater safety and hygiene is also achieved through sweeping advances in material technology - our XDTECT plastic has a truly unique formulation that offers metal detectability, x-ray visibility, shatter resistance and antibacterial protection in 8 vibrant colours for visual detection and colour co-ordination.

At BST we also offer the highest quality service to match the shine of our products. The BST DetectaPen can be colour pad printed with your company name, logo or contact details for promotional purposes. We also have the capability to mould your company name on the side of your BST DetectaPen subject to minimum volumes.

Size:	600 x 400 x 220mm
Colour:	Blue
Pack Size:	1

## Caster Dolly

Product Code:	BX1R1173NB
Size:	650 x 450 x 190mm
Colour:	Blue
Pack Size:	1

The BST DetectaBox is designed to address the problem of box fragments contaminating food products. This problem can occur whenever a food storage or handling box is subject to more wear and tear than usual and it is at risk of breaking or chipping.

The DetectaBox is manufactured using XDETECT®, BST's flagship and industry renowned metal detectable and x-ray visible plastic. This plastic is designed entirely with food safety in mind. As well as being highly detectable it is also strong, hardwearing, brightly coloured, chemical resistant, shatter resistant, FDA approved and EU compliant.

Suitable For:	Cardboard, Plastic Strapping, Shrink Wrap

## Triac

Product Code:	KN1212400MB
Colour:	Blue
Pack Size:	1
Suitable For:	Boxes, Cardboard, Plastic Strapping, Plastic Sheeting

## Tanin

Product Code:	KN1431453MS
Colour:	Blue
Pack Size:	1
Suitable For:	Plastic Films, Plastic Strapping, Packaging

## Grøpin

Product Code:	KN1402400MS
Colour:	Blue
Pack Size:	1
Suitable For:	Plastic Films and Plastic Strapping, to tear and cut Packaging

## Profi 25

Product Code:	KN51PR25905MB
Colour:	Blue
Pack Size:	1
Suitable For:	General Use

## ReAkta

Product Code: KN31R5808MB

Colour: Blue

Pack Size: 1

Suitable For: General Use

## Boxer 700

With Security Key: KN31B7315MB

Without Security Key: KN31B7305MB

Colour: Blue

Pack Size: 1

Suitable For: Cardboard, Plastic Strapping

## Universal GR8

Product Code: KN746242MB

Colour: Blue

Pack Size: 1

Suitable For: Cardboard, Plastic Strapping, Shrink Wrap

## Shark

With Hook (as shown): KN31H1408MB

Without Hook: KN31H1008MB

Colour: Blue

Pack Size: 1

Suitable For: Shrink Wrap, Plastic Strapping, Packaging Paper, Tape, Netting, Cardboard

## Fish 200

With Hook (as shown): KN31F2005MB

Without Hook: KN31F2305MB

With Tape Cutter: KN31F2105MB

Colour: Blue

Pack Size: 10

Suitable For: Shrink Wrap, Plastic Strapping, Packaging Paper, Tape, Netting, Cardboard

## Combi

With Security Key: KN51C77105MB

Without Security Key: KN51C73305MB

Colour: Blue

Pack Size: 1

Suitable For: Thick Plastic Sheeting, Leather, Plastic Strapping

# Tools ~ Disposable Safety Knives

## Fish 600

With Hook (as shown): KN31F6007M\*  
 Without Hook: KN31F6307M\*  
 Blue With Tape Cutter: KN31F6107MB  
 \*Colour: B,R,G,Y  
 Pack Size: 10  
 Suitable For: Packaging Paper, Cardboard,  
 Plastic Strapping, Shrink Wrap, String Netting

## Fish 2000

Product Code: KN31F20606MB  
 Colour: Blue  
 Pack Size: 10  
 Suitable For: Plastic Strapping, Paper, Box  
 Tape, Cable Ties

## Penguin 400

Product Code: KN31P4307M\*  
 Colour: B,R,G,Y  
 Pack Size: 10  
 Suitable For: Light Duty, Shrink Wrap, Plastic  
 Strapping, Packaging Tape

## Penguin 900

Product Code: KN31P9109M\*  
 Colour: B,R,G,Y  
 Pack Size: 5  
 Suitable For: Heavy Duty, Shrink Wrap,  
 Plastic Strapping, Packaging Tape

## Penguin 1000

Product Code: KN31P10106M\*  
 Colour: B,R,G,Y  
 Pack Size: 10  
 Suitable For: Shrink Wrap, Plastic Strapping,  
 Packaging Tape

## Swan 300

Product Code: KN31S3306MB  
 Colour: Blue  
 Pack Size: 10  
 Suitable For: Paper, Plastic Bags, Sacks

# Tools ~ Disposable Safety Knives

## Dispo Lite

Product Code:	KN571212MB
Colour:	Blue
Pack Size:	10
Suitable For:	Heavy Duty, Shrink Wrap, Plastic Strapping, Bags, Packaging Tape

## Castrat

Product Code:	KN721400MB
Colour:	Blue
Pack Size:	5
Suitable For:	Light Duty, Plastic Strapping, Shrink Wrap, Bags, Letters

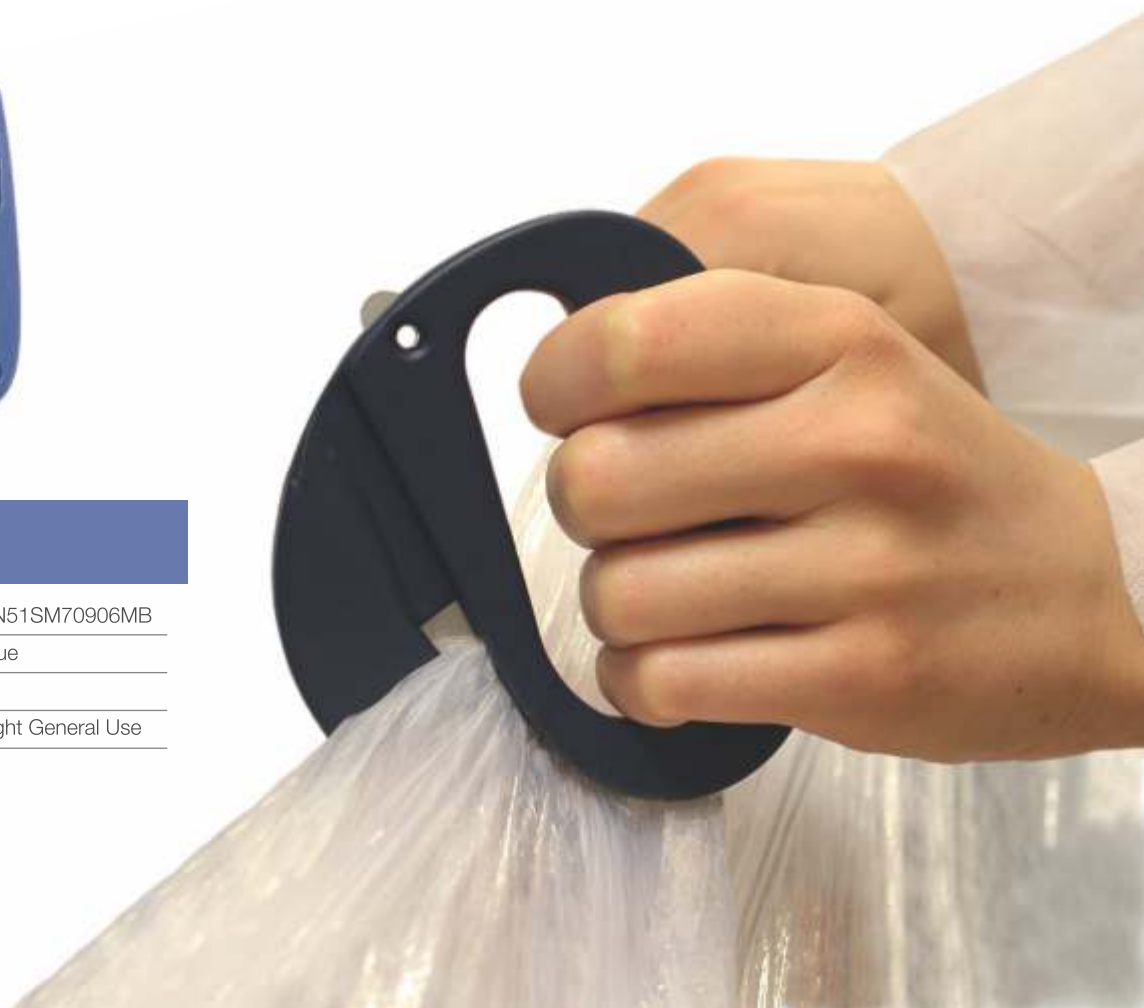

## Cenon

# 5 EASY STEPS TO CORRECTLY WEAR YOUR HAIRNETS & BEARD SNOODS

**1** Hold the Beard Snood with the closures east to west, holding the elastic in one hand and the body of the Beard Snood in the other. Locate the elastic to the back of the head and make sure the Beard Snood covers the nose.

**3** Before donning the Hairnet, brush and tie the hair back. make sure it is not tied too low down, as the Hairnet elastic needs to lay flat against the neckline.

**4** With the closure north to south hold the Hairnet open ready for donning. Wearing it this way pulls the meshes closer together. Locate across the forehead and pull the Hairnet over the crown, ensuring all hair in the nape of the neck is covered. Locate under the ears, to keep the Hairnet securely in place.

**2** Locate under the chin and ensure the elastic is over the ears. The Hairnet should not be put on first as the Beard Snood closures are covered by the Hairnet. This provides extra security and ensures the Beard Snood is kept in place.

**5** Check all hair is fully enclosed, that the double elastic headband is laying flat and is located under the ears. If necessary get a colleague to double check. Put on other PPE after the Hairnet has been donned. This ensures that any hair dislodged by adjusting, isn't taken into the workplace.

## Bespoke Labels & Stickers

BST have the capability to manufacture bespoke detectable labels and tags to your exact requirements. Our standard heat resistant loop tags can also be supplied pre-printed to your requirements at no extra cost! (Subject to minimum volume). As well as our standard heat and tear resistant paper materials, we can also supply heavy duty aluminium tags for situations where durability is essential.

□ The tags are developed to be strong and durable, which has been proven throughout our factory. The line colours are an imperative part of our day to day running, allowing us to successfully and effectively manage allergens and species across site.

BST are committed to manufacturing products that work for you, and provide excellent customer service whilst doing so. □

## Can't find what you are looking for?

It's truly fascinating and also quite scary to see the range of foreign bodies that can find their way into food, even when it's subjected to minimal processing. As such, some customers sometimes wish to encapsulate and test against a wide range of contaminants including lead shot, metal nuts &, bolts and even pieces of our own detectable plastics.

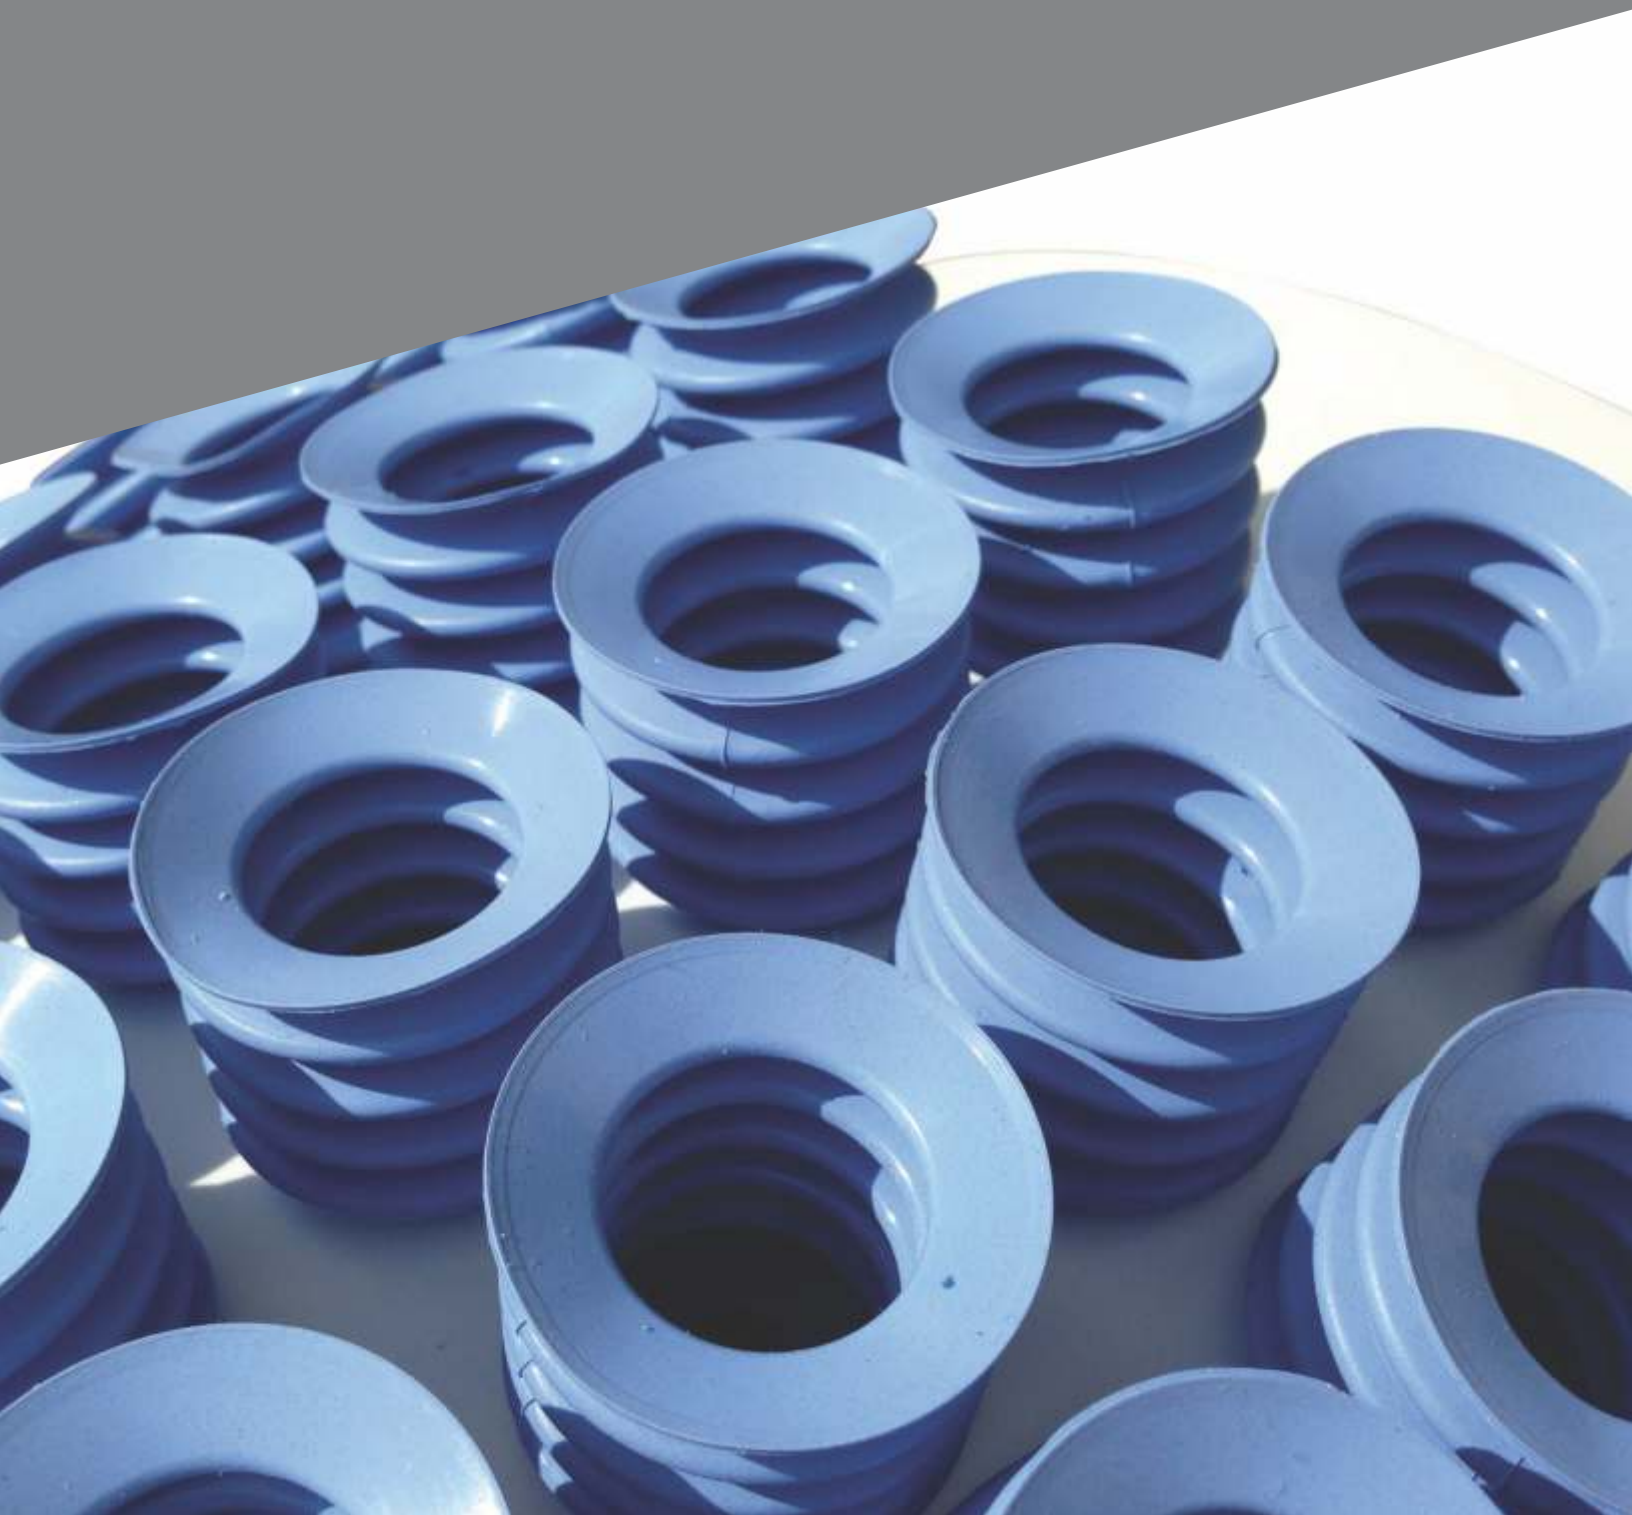

Customers sometimes require very specific shapes and sizes of test pieces to accommodate their production process. No matter how obscure your requirements, we pride ourselves on taking the time to offer customers a tailored product at a fair price.

To discuss your needs in detail, please call or email us with as much requirement information as possible.

## Want to know more?

LPS is a leading food-grade MRO chemical manufacturer that developed the innovative technology, DETEX™ to help reduce the risk of foreign object contamination during food and beverage processing.

All DETEX™ components are Metal and X-Ray detectable and are capable of detection by conventional metal detection systems. These products are high performance, food safe maintenance chemicals that are engineered to clean, lubricate and protect food processing equipment. BST are a proud partner of LPS, exclusively distributing DETEX™ products throughout the UK food processing industry.

- ✓ Only 2% propellant means up to 28% more usable product compared to many other brands
- ✓ Unique spray direction indicator which ensures the can is emptied
- ✓ The can will continue to spray whilst inverted for ease of use
- ✓ Fine jet technology for accurate spraying
- ✓ Cost cutting consolidation programme available
- ✓ Competitive pricing with improved rates for high volume users
- ✓ Reduce health and safety issues with metal and x-ray detectable caps and actuators

## BST Depanner Range

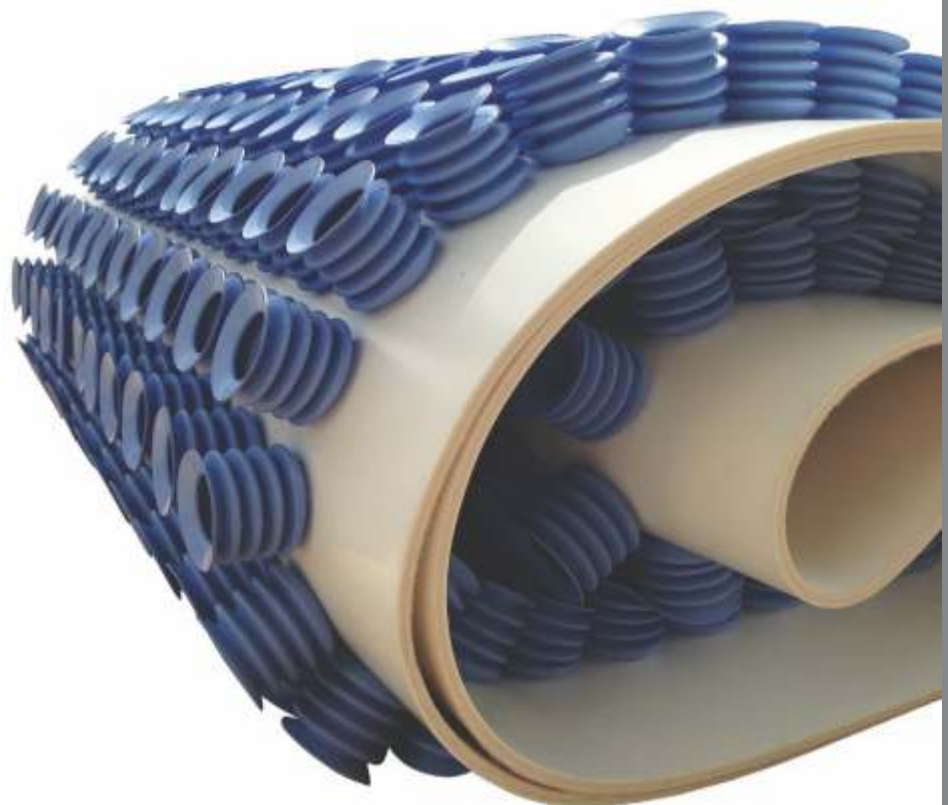

BST have 30 years experience in the supply of vacuum depanner belts, which are widely used throughout the baking industry.

Our food grade belts are three ply fabric backed with a smooth white PVC finish on the product facing side. These belts are strong, highly durable, chemical resistant and heat resistant to 166 .C. Belts can be supplied pre-loaded with detectable retainers and suction cups or can be supplied blank.

We supply a wide range of detectable retaining clips to achieve varying reach and airflow, as well as a wide range of detectable cups to achieve various levels of flex and optimum suction on the product.

Please call 0845 643 0950 and speak to our technical team in order to discuss your requirements.

### Silicone Rubber Sheeting

Pack Size:	1.0m

### Bespoke O-Rings

BST have vast experience in the supply of moulded and cut length o-rings manufactured using metal detectable Silicone, Nitrile and EPDM materials to industry standard sizes or dimensions bespoke to your machinery.

# Bespoke Solution Services

BST specialise in developing new products to address contamination risks. We can draw on an extensive network of specialised British manufacturers, many of whom we have formed close partnerships with over generations. We have at our disposal a wide range of detectable food safe plastics and rubbers, including variants of Polypropylene, Polyethylene, Polyurethane, Silicone and Nitrile.

Examples of bespoke developments include pick and place suction cups, silicone extrusions, o-rings, gaskets and machinery parts – all made with BST's detectable materials.

Don't wait for an audit non-conformance or even worse a recall! Speak to BST and let us help you address the Problem at its source. We would be pleased to visit you on site to help us gain a true understanding of your needs and deliver you the best solution.

While selecting the best quality tools for our machinery's tool kits we had the idea to apply Metal & X-ray detectable items to our range to optimise end product safety. BST were an easy choice of partner, as we share a focus on both quality and innovation, which are pre-requisites in the Pharmaceutical and Nutraceutical Environment in which we operate. Their energy and expertise continues to assist us in ground breaking new innovations relating to our niche working environment.

PTK-GB have more than 25 years' experience with the supply of Tablet Compression and Encapsulation machinery, as well as machine parts and Compression Tooling. The range offered by BST very much complements our existing product ranges and helps us in striving for higher levels of Good Manufacturing Practice.
